

Region: Brussels

Sector: Railway, Signaling, Transport

Who are we?

EGLF Engineering is a company specialized in the design of electronic equipment used in the transport sector: train, tramway, automotive, public transport, signaling, ...

We are partner of some major industrial actors, as well as fleet operators or infrastructure operators. Our activities are today mainly located in Belgium, but we are regularly involved in mission across the rest of Europe.

We are a young and flexible company and as such, we are offering an optimal context for engineers to increase their experience.

We are today looking to recruit a

Product Manager

(Electronic Devices for Public Transport)

Profile

- Bachelor's degree in engineering, Computer Science, or a related field. Advanced degree or MBA is a plus.
- Minimum of 5 years in product management within the electronics or transportation industry.
- Proven track record of successfully launching and managing electronic products for public transport vehicles.
- Familiarity with hardware and software development processes.
- Proficient in English (mandatory). Proficiency in French or Dutch is a plus.
- Behavioral competencies:
 - Exceptional leadership skills with the ability to motivate cross-functional teams.
 - Strong analytical and problem-solving skills.
 - Excellent communication and interpersonal abilities.
 - Strategic thinker with a customer-centric approach.
 - Proactive and adaptable to changing market trends.
 - Detail-oriented and capable of managing multiple priorities simultaneously.

Function:

As a Product Manager for electronic devices in public transport vehicles, you will play a pivotal role in driving the development and success of our cutting-edge solutions. Your responsibilities include:

- Conducting market research to identify opportunities and threats in the public transport sector.
- Collaborating with cross-functional teams to define product requirements and specifications.
- Managing the end-to-end product lifecycle, from concept to delivery, ensuring products meet high-quality standards.
- Developing and executing go-to-market strategies, including product positioning, pricing, and promotional activities.
- Engaging with customers to gather feedback and insights, ensuring our products align with their evolving needs.
- Keeping abreast of industry trends, technological advancements, and regulatory changes to inform product development.
- Coordinating with engineering, manufacturing, and sales teams to achieve product milestones and business objectives.
- Providing leadership and direction to the product team, fostering a culture of innovation and continuous improvement.
- Monitoring and analyzing product performance metrics, implementing corrective actions as needed.
- Serving as a liaison between internal stakeholders and external partners to ensure seamless collaboration.

Offer:

By joining EGLF Engineering, you will be part of a young company that will allow you to develop your competences in a sector which is in constant evolution. You will participate in the technological challenge required by the transport of tomorrow. We offer:

- Permanent contract
- Competitive salary including mobile phone, meal vouchers, pension scheme & hospitalization, eco-cheques
- Positive & stable working atmosphere
- Company car and/or public transportation

Apply by sending us your resume at info@eglf-engineering.be.
